

Biography

Michikazu Hara obtained his Ph.D. degree in chemistry at Tokyo Institute of Technology in 1992. After graduating, he spent several years as a researcher at Research and Development Center, TOSHIBA Corporation. In 1999–2000, he had worked for the Pennsylvania State University as a postdoc supervised by Professor Thomas E. Mallouk. In 2006, as a Professor, he moved to the Materials and Structures Laboratory in Tokyo Institute of Technology. He was awarded fifth Scientific American 50 (2006) because of sulfonated carbon catalyst.
