The 1st International Conference on MEXT Project of Integrated Research on Chemical Synthesis

Advanced Chemical Methodology for Creating Materials

2010-2016 MEXT Project

2011.1.24MON-25TUE 13:00-15:00

Catalysis Research Center, Hokkaido UNIV. (North 21, West 10, Kita-ku, Sapporo 001-0021, Japan)

Kenneth D. KARLIN(Plenary) Ira Remsen Chair in Chemistry Johns Hopkins University, Chemistry Department

Copper-Dioxygen & Cupric-Hydroperoxo Complex Formation, Properties and Reactivity

Yuichi SHIMAKAWA Institute for Chemical Research, **Kyoto University**

New Functional Transition-Metal Oxides

Masahiro YAMASHITA Graduate School of Science,

Spintronics Based on Single-Molecule Quantum Magnets

Andy HOR Department of Chemistry, National University of Singapore

From Curious Structures to New Chemistry

Kimihisa YAMAMOTO Chemical Resources Laboratory, Tokyo Institute of Technology

Metallodendrimers for Advanced Hybrid Nano-Materials

Zhaomin HOU RIKEN Advanced Science Institute

Novel Polymerization Catalysts and Hydride Clusters from Lanthanide Dialkyls

Kenichiro ITAMI Graduate School of Science. Nagoya University

Challenges in Arene-Assembling Chemistry

Tatsuya TSUKUDA Catalysis Research Center,

Size-Specific Oxidation Catalysis of Gold Clusters

Marc KOPER Leiden Institute of Chemistry, Leiden University

Electrocatalysis at gold

ree

Pohang University of Science

Wonyong CHOI

Hybridization of TiO₂ with Organic and Inorganic Materials for Higher photocatalytic Activities

Yi-Chou TSAI Department of Chemistry, National Tsing Hua University

Univalent Transition Metal β -Diketiminates: Synthesis and Reactivity

Yoshinori NARUTA

Institute for Material Chemistry and Engineering & International Institute for Carbon Neutral Energy Research, Kyushu University

Development of Water-Oxidation Molecular Catalysts toward Artificial Photosynthesis

Organized by CRC, Hokkaido Univ. under Mext Project Contact: Wataru Ueda CRC, Hokkaido Univ., Japan E-mail: ueda@cat.hokudai.ac.jp Phone: +81-11-706-9162(FAX9163)
