

Atsushi Fukuoka

Professor
Hokkaido University

Atsushi Fukuoka is a Professor at the Institute for Catalysis (ICAT), Hokkaido University. He studied homogeneous catalysis under the guidance of Prof. Masanobu Hidai at the University of Tokyo and received a PhD in 1989. Then he moved to Hokkaido University and started research on heterogeneous catalysis with Prof. Masaru Ichikawa. In 1991-1997, he worked for Tokyo University of Agriculture and Technology, and then he was appointed as a full professor at Catalysis Research Center (CRC), Hokkaido University in 2007. In 2010-2014 he served as Director of CRC and led the reorganization of CRC to ICAT. Now he is an Advisor to the President of Hokkaido University. He received the Catalysis Society of Japan Award in 2015 and the Chemical Society of Japan Award in 2023. He served as President of the Catalysis Society of Japan in 2018-2019 and has been an executive committee member of the International Association of Catalysis Societies since 2016. His current research topics are the catalytic conversion of cellulose and chitin and the catalysis for freshness preserving.
