

MIZUKI TADA

Professor
Nagoya University

Prof. Mizuki Tada was received her Ph.D. at the department of chemistry, the University of Tokyo in 2005. She took up an assistant professor position at the University of Tokyo and moved to Institute for Molecular Science as an associate professor in 2008. She is a full professor of chemistry at Nagoya University since 2013. She worked at RIKEN as the team leader of element visualization team at SPring-8. Her research interests are the surface design of metal-complex catalysts, catalysis on oxygen storage materials, operando XAFS imaging of heterogeneous catalysts and fuel cells.
